Project Reflection

The hardest part was to decide how to condense my multifaced personality into one logo.

The flower symbol was removed from my logo. The thought was that it represents growth. After reflection, I concluded that excellence was more important to me, hence the star.

This design is simple. Emphasizing that my biggest goal in life is simple. I want to be better than I was yesterday. Growth is depicted with the font chosen for the letter ‘A’, as growth tends to happen one step at a time. The circle represents me as whole, and content.
